

Tidfore and FLSmidth cooperate in bulk material handling equipment intelligentizing

On 8th March, the cooperation & promotion signing ceremony between Tidfore and FLSmidth Automation Company was held in Tidfore Jiuhua industrial park. FLSmidth Automation Company will supply 3D automatic scanning system, equipment technological guideline and training for Tidfore. It's the first time for FLSmidth technology to enter Chinese market.

Demark FLSmidth Automation Company is the global leading company in bulk material handling equipment and system intelligent & automatic control system. It has been developing & researching the bulk material handling system while promoting it for about 10 years, 40 or more stockyard automatic programs were implemented during this period.

Tidfore cooperates with Korea DY to expand global port market

Mr. Zhang Yong, President of Tidfore Group, led a delegation to Seoul and Pohang for a five-day visit from December 20 to 24. Cooperation agreements on expansion of global port market have been reached with Pohang Municipal Government and Korea DY Engineering Company respectively.

Tidfore discussed overseas business with Korea Bishan Engineering Company

which is specialized in engineering procurement construction.

On the afternoon of December 23, Mr. Zhang wasinvited by Mr. Li Kangde, Mayor of Pohang, to an evening banqueton Pohang investment and cooperation enterprises. Both sides discussed POSCO EC's projects in Vietnam and Mongolia and Tidfore's project to build a heavy equipment manufacturing park in Pohang.

Embrace the spring, green 2016 –Tidfore public benefit activity of planting & adopting trees

On 11th March, Tidfore group Ceo-Mr Yong Zhang, executive-Mr Zhiyuan you attended the 2016 public benefit activity of planting & adopting trees in Xiangtan economical development zone. There were totally 2016 trees adopted this time,

which covered 110 acres, Tidfore adopted 200 trees this time and named it "Tidfore Woods". Tidfore is always responsible and warm to enter charity activities actively each year as the feedback to the care from government and the society.

Tidfore “talent oceangoing voyage” – To forge the Chinese “Huangpu Military Academy”

Recently, Tidfore has started its “talent oceangoing voyage”, ever since November in 2015, Tidfore human resource department organized 137 of its pioneer talents to join the writing examination of “Talent oceangoing voyage” plan, and 45 of them was selected for the final training. It's just like the “Huangpu Military Academy” in China, which aims to train the interdisciplinary talents for Tidfore.

Tidfore independent “Research & Development” is being proceeded

Recently, Tidfore has finished the assembling and debugging of its automatic backward deformation welding equipment, which has been successfully applied in the Zhaohua Bridge box girder plate manufacturing. It means that Tidfore has maintained more significant competitiveness in bridge business area.

Tidfore “One body & Two wings” enters the Asian Marine industrial fair

On 29th March, the biggest Asian marine work fair was held in Beijing international exhibition center in China. Representing the new force of the Chinese intelligent manufacture, Tidfore brought in its operation system of “One body & Two wings”, its innovative general contracting mode has attracted the attention from the domestic or foreign professional audiences.

Belt and Road is expanding markets and driving growth

With more than two years of development, the Belt and Road Initiative has proved to be apractical tool for driving the growth of both Chinese and global companies, said businessleaders.

The initiative, proposed by the Chinese government in 2013, envisages a Silk Road EconomicBelt and a 21st Century Maritime Silk Road covering about 4.4 billion people in more than 60countries and regions in Asia, Africa and Europe.

Thanks to the initiative, China so far has established 75 overseas economic and tradecooperation zones in 35 countries and regions, according to the Ministry of Commerce.

Chinese outbound investment keeps a good momentum

With the transformation and upgrading of structure of Chinese economy, Chinese outbound investment keeps going at a steady pace. The latest data show that China non-financial outward foreign direct investment increased 14.7% year-on-year in 2015, reaching \$118.02 billion which hit a record high. At the same time, published overseas merge and acquisition transaction of Chinese enterprises reached \$87.7 billionlast year which grew 40% from a year earlier. Since the beginning of this year, it enjoys a sound development momentum. In the first two months of this year, it has already reached \$74.8 billion.

Sri Lankan PM says port project no threat

During Prime Minister Ranil Wickremesinghe's visit to Beijing, the Sri Lankan government sought more investment despite a compensation claim from a Chinese company involved in a major port project remaining unresolved.

Wickremesinghe, who wrapped up his first visit to China over the weekend, said on Saturday that his government is giving special status to the Colombo Port City project and that the port's profitable future has attracted many Chinese investors

“Green miracle, healthy lung” : 50 Tidfore riders headed for environment protection and LC

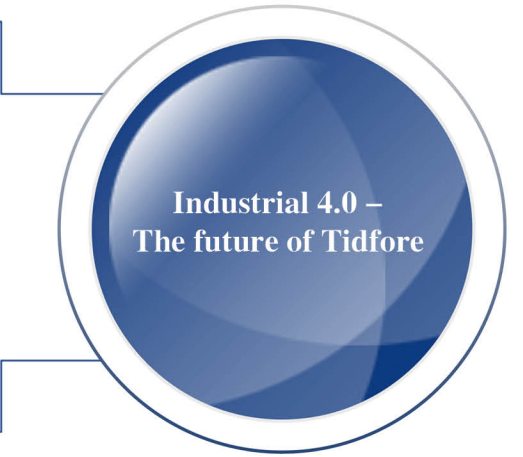

28th March, Changsha was rainy with cold wind. 50 Tidfore bicycle riders gathered in the scenic belt along the Xiang River in Yuelu district, to hold the bicycle race with the theme of “Green miracle, healthy lung” for “The world's tuberculosis prevention and treatment day”, which aimed to promote the public to practice more and get rid of illnesses while leading a low carbon and environment friendly life.

This riding trip is a part of the serious of activities with the theme of “Spring wind blows in March, Public benefit runs in Tidfore”. Tidfore will continuously organize other public benefit activities. Presently, there are already themes of “reclaiming wasted battery ”and “caring for lonely olds ”in processes.

Industrial 4.0–The future of Tidfore

In February, 2016, the Chinese government has started the “Internet +” plan together with the “Chinese manufacture 2025” plan, which means a revolution in China from the thinking mode to manufacturing technology. Thus, Tidfore followed this and pointed out the “Tidfore Group industrial high end manufacture & trading synthetic managing system”, to realize digitalization through “internet+”,thus to lead the whole industry to move forward the “Industrial 4.0”, and the “Industrial 4.0” is gradually leading the future of Tidfore.

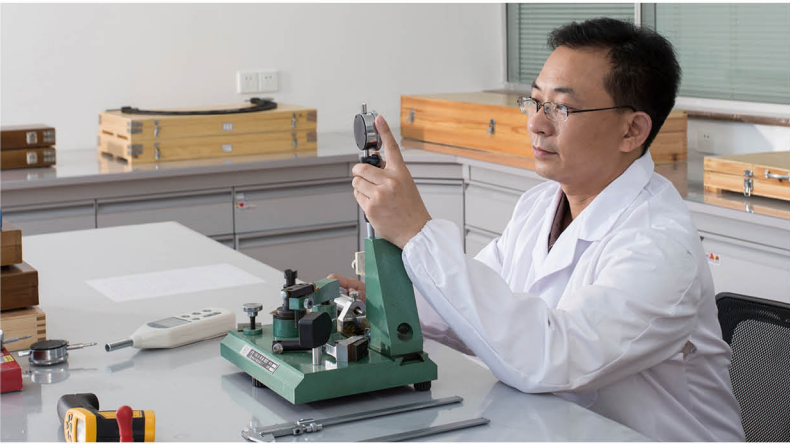

Technical & Testing platform development

In January of 2014, “Hunan bulk material handling equipment manufacture & system engineering technology research center” was approved by Hunan provincial science and Technology Department, in August of 2014, it rewarded Tidfore the name of “Hunan enterprise technology center”.

Tidfore keeps prompting the establishment of national engineering technology research center, national enterprise technology center, human engineering laboratory, national engineering laboratory, post-doctoral research station construction and reporting, thus to promote the development of enterprise and the whole industry.

In 2016, Tidfore has cooperated with numerous national steel, electric power, sea port and other industrial design institute,

constructing an intelligent environmental friendly technology experimental center covering 5000 square meters with openness, to become the national first experimental center in the field of comprehensive intelligent environmental technology, bettering the foundation for the technical development and application of the bulk material field in our country.

China is capable of keeping a medium–to–high economic growth this year

As the world's second largest economy, China's economic growth has attracted much attention. China's GDP growth fell from 7.3% in 2014 to 6.9% in 2015. This growth rate is in accord with Chinese government's expectation of “around 7%” made in early 2015. What about China's economic prospects of 2016? People from both home and abroad are much concerned about this issue. Currently, Chinese economy is going through structural transformation and speed shift. Economic factors like labor supply, resource and environmental cost, space for technological catch-up and external market demand are also changing. However, whether viewing from demand side or supply side, China still has the potential for a fast economic growth; and based on the existing policy effect and future selectable policy tools, China surely has the conditions to realize the growth potentials.

Ethiopia keen to be model in China–Africa cooperation: minister

ADDIS ABABA - Ethiopia is keen to be a model in cooperation between Africa and China, Minister of Finance and Economic Cooperation, Ahmed Shide, has said.

Shide made the remarks on Wednesday during a meeting between heads of multiple Ethiopian ministries and representatives of the Chinese business community.

They discussed ways to boost Chinese investment in Ethiopia and cope with challenges facing Chinese investors in Ethiopia.

Shide said Ethiopia and China have been enjoying comprehensive cooperation, based on mutual respect and win-win situation.

At the Johannesburg Summit of Forum on China-Africa Cooperation, Chinese President Xi Jinping announced ten major plans of China-Africa cooperation over the next three years, backed by a package of 60 billion US dollars, including interest free loans and preferential loans.
